About Me

I am a 19-year-old web and mobile app developer born on January 21, 2006. I started learning programming in 2021 and became serious about it in July 2022. Currently, I specialize in building applications using modern technologies. For more details, visit my portfolio at kamdidev.vercel.app.

Education

Self-Taught Developer, Online Learning Jan 2021 – Present

- Began learning programming in 2021 with a focus on web and mobile development starting July 2022.
- Studied through online resources, tutorials, and hands-on projects.

Experience

Freelance Web and Mobile App Developer, Remote July 2022 – Present

- Developed responsive web applications using React.js, Next.js, and Tailwind CSS.
- Built cross-platform mobile apps with React Native.
- Created RESTful APIs with Express.js and integrated NoSQL databases like MongoDB (via Mongoose) and Firebase.

Projects

Personal Portfolio kamdidev.vercel.app

- Designed and deployed a personal portfolio to showcase my skills and projects with a modern, responsive design.
- Tools Used: Next.js, Tailwind CSS, Vercel.

Kanban Task Manager 2023

- Built a web-based Kanban board for task management, featuring drag-and-drop functionality and real-time updates.
- Tools Used: React.js, Tailwind CSS, Firebase.

E-Commerce Platform 2024

- Developed a full-stack e-commerce application with product listings, cart functionality, and payment integration.
- Tools Used: Next.js, Express.js, MongoDB, Tailwind CSS.

AI Chatbot 2024

- Created a web-based chatbot inspired by ChatGPT, leveraging OpenAI's API for natural language processing and real-time responses.
- Tools Used: Next.js (TypeScript), Express.js, OpenAI API.

Technologies

Languages: JavaScript (JS), TypeScript (TS)

Frameworks & Libraries: React.js, React Native, Next.js, Express.js, Tailwind CSS, Lynx.js

Databases: MongoDB (Mongoose), Firebase

APIs: OpenAI API
